technical services l.l.c.

profile  
[www.equitechnical.ae](http://www.equitechnical.ae)

We are a Dubai based company that began in 2004 as a division within one of the oldest companies in the U.A.E. In 2012 we established ourselves as a separate entity.

We have developed a highly skilled, knowledgeable and well trained team and focus on niche services within the flooring, water and ICF (Insulated Concrete Form) service requirements. This spans many sectors including residential, commercial, construction, utility, facility management and many others.

From our offices and warehouse facility in Dubai Investment Park, we are able to serve all of the U.A.E. and if needed we can also support projects in the Gulf and East Africa. We are fully equipped with all required tools, machinery, vehicles and underwater robotic fleet.

## Our Values

---

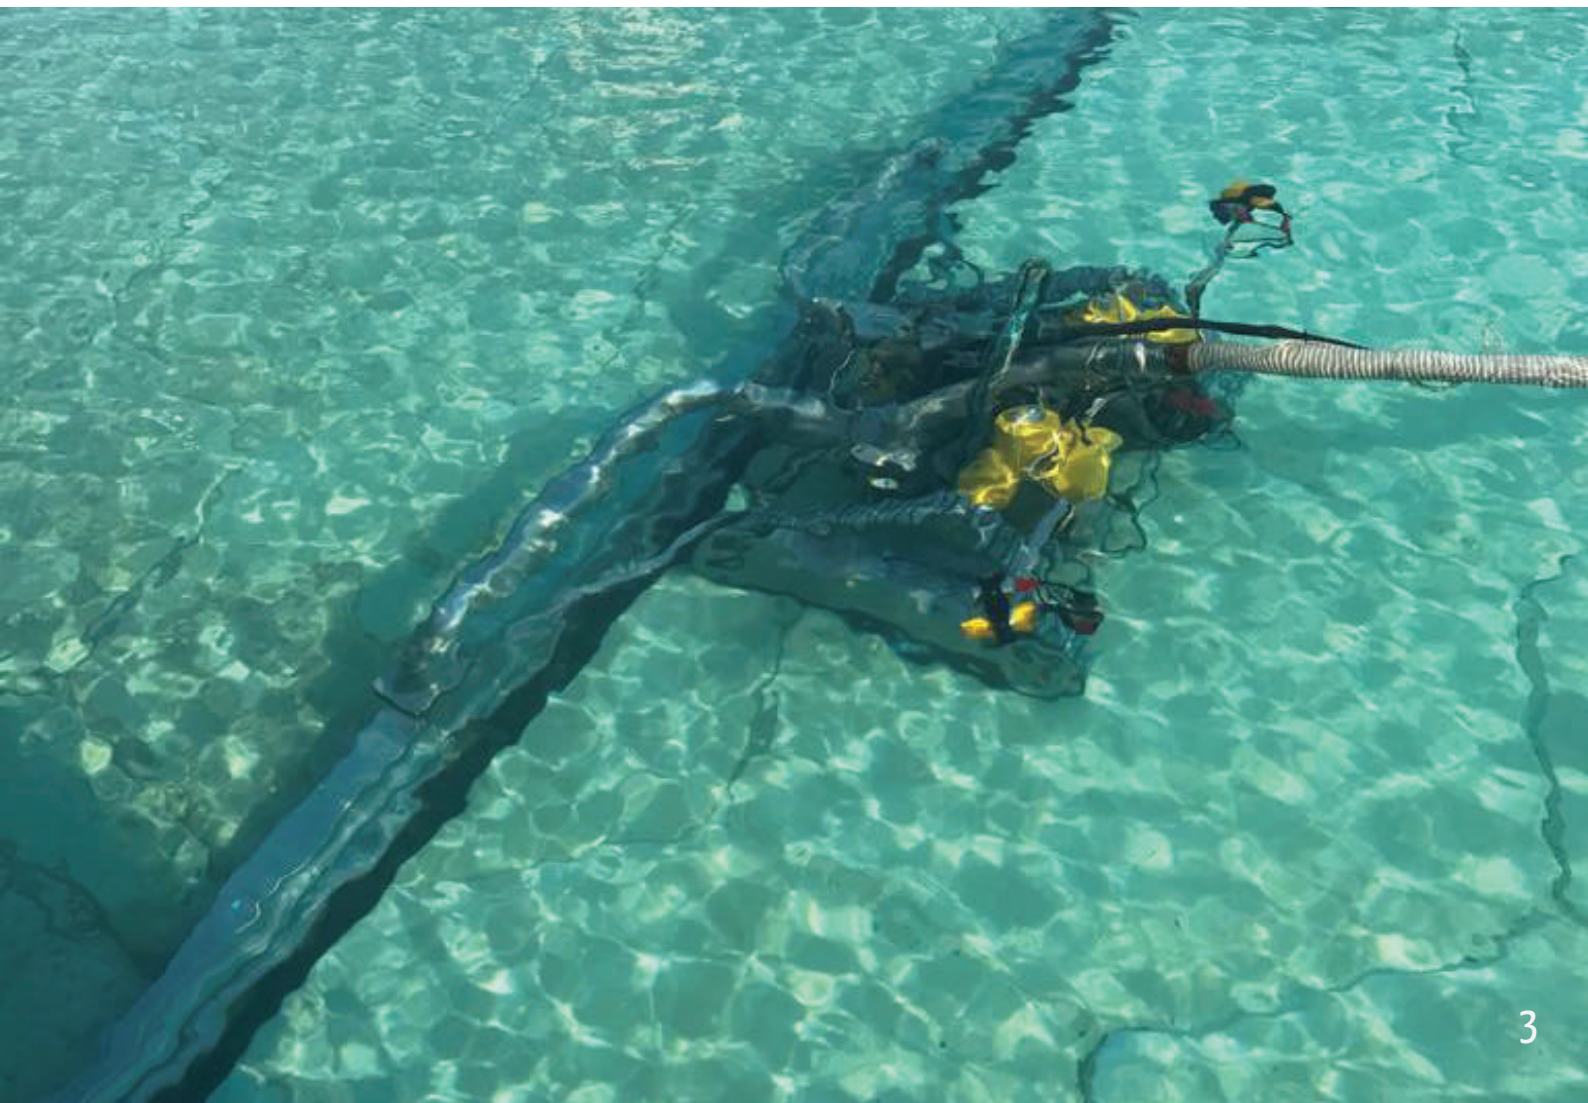

# COMBINING CRAFTSMANSHIP WITH TECHNOLOGY

Providing a great work atmosphere, new and best in class tools and machinery, regular product and skills training coupled with experience assures a high quality of craftsmanship. Adopting and incorporating technology into our processes keeps us efficient, able to respond quickly to our customers and maintain a leading position.

Management and site engineers use our cloud based CRM, finance and project management I.T. platforms to improve project coordination and delivery. Site technicians receive, update and interact with site engineers by using wearable technology.

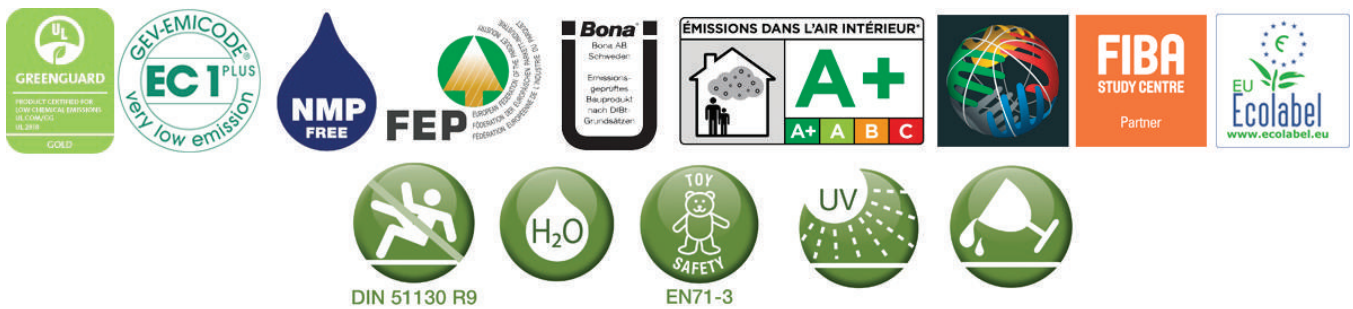

We work closely with our customers to ensure that we are delivering the most efficient solutions even to the extent that together with suppliers we have designed and delivered bespoke equipment tailored to the customers needs such as the Weda YT 5000 for Emaar which is the world's largest underwater cleaning robot with a cleaning head of 5 meters.

# WOOD FLOOR CARE AND RENOVATION

We use the very best of equipment and materials from Bona AB, the world's leading wood floor coating manufacturer. All products meet the highest international standards for performance, environmental requirements and sustainability.

Our technicians have achieved Bona Certified Craftsman certification and follow the Bona floor care programs ensuring that you receive the highest levels of quality and efficiency and keep your floors always looking great.

# INSTALLATION

We have supplied and installed wood flooring for interior spaces and external decking projects ranging from 1 M2 to 38,000 M2.

## BRONZE

The Bronze treatment is a new effective way of keeping floors beautiful, bringing dull wooden floors back to life in an instant. We have AMC's in place with many hotels across the U.A.E. for our Bronze, Silver and Gold treatments.

## SILVER

When the top layer of a wooden floor's protective surface is slightly stained or showing light scratches, the Silver Treatment can effectively restore its original beauty.

## GOLD

When the floor is severely damaged or yellowed, showing deep scratches and a completely lifeless appearance, the Gold Treatment is recommended. Your floor can be completed in a wide range of textures and styles.

# RESILIENT FLOOR CARE AND RENOVATION

Being a game changer in resilient floor maintenance, the Bona Resilient Care Program enables any floor owner an entirely new possibility of updating their existing resilient floors.

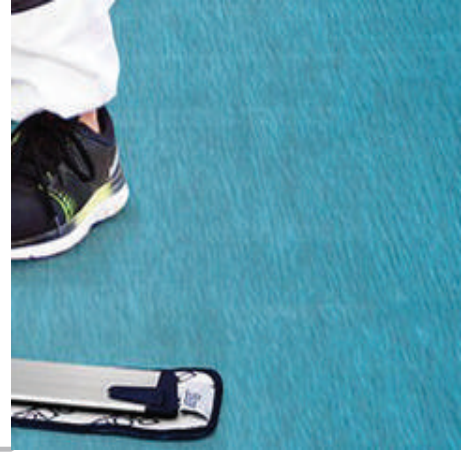

## A Care Program for Every Situation

The Bona Resilient Care Program is an innovative, highly effective program for care and maintenance of resilient flooring. Our high quality, sustainable program allows you, to not only maintain floor freshness but also to totally transform the look of your existing floor without replacing it. Even in heavy traffic areas, surfaces can be sealed for extra durability and long-term protection.

## CLEANING

With regular cleaning it is possible to preserve the quality, durability and extend the lifetime of resilient floors, not to mention maintain a clean, healthy indoor environment.

## DEEP CLEANING

Bona's unique deep cleaning treatment works hard to remove stubborn stains and restore the freshness and appearance of a range of surfaces, from PVC, to Linoleum, without the costs and downtime associated with full renovation

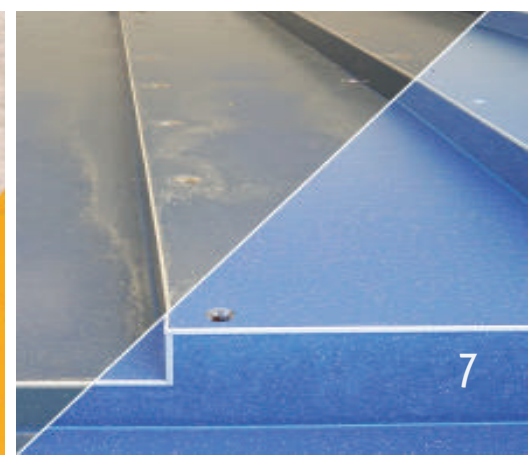

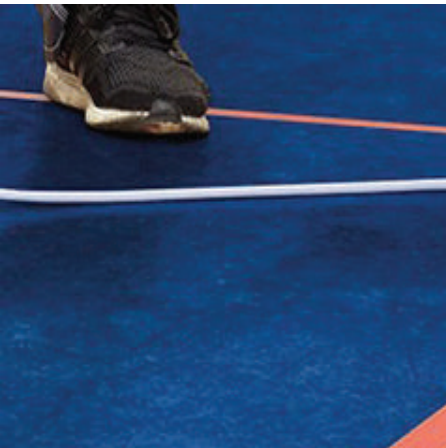

## PROTECTING

Resilient floor surfaces can easily be restored by scrubbing and pre-cleaning, then applying a Bona protecting product like Bona Shield bringing it back to new life.

## RECOATING

Using Bona's unique recoating treatment, heavily worn resilient floors now could be completely restored with a minimum of downtime.

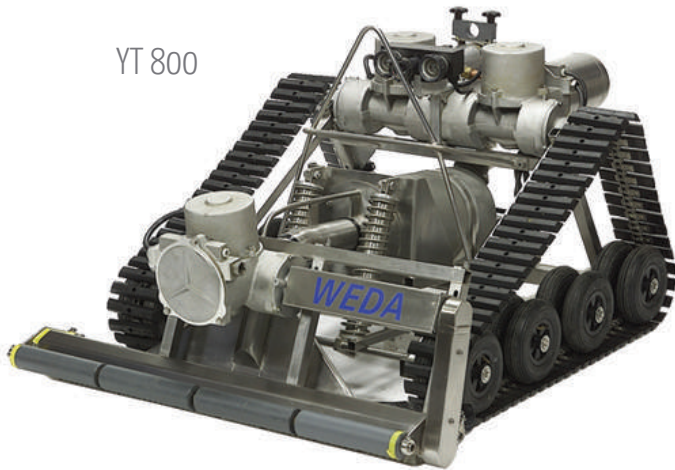

# UNDER WATER ROBOTIC CLEANING

Using our fleet of Weda underwater robots, we offer underwater cleaning solutions with automatic and semi automatic robots. We work with our clients to tackle even the most difficult challenges. We clean the largest man made pools in the world, water sewage treatment plants and industrial basins. Our current fleet consists of: YT 800, VR 600, YT 600, B600 and W50

## FOR INDUSTRIAL SOLUTIONS

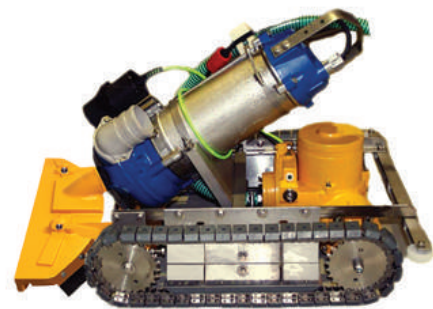

YT 800

VR 600

YT 600

## FOR COMMERCIAL AND PRIVATE POOLS

B 600

W 50

# AMPHIBIOUS VEHICLES

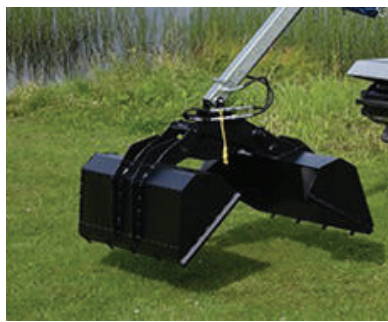

Using our Truxor DM, we provide the ultimate solutions for working with cutting and collecting aquatic weed and reed growth, dredging, excavating, oil spill- clean up and much more.

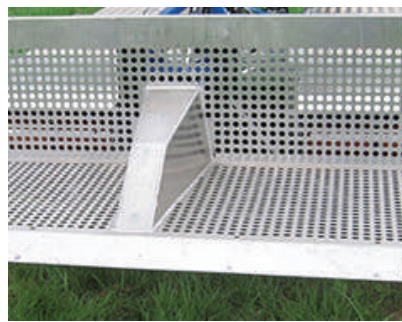

Dredging

Grip Bucket

High Lift Rake

Spring Rake

# INSULATED CONCRETE FORMS

Building with ICFs allow concrete homes and commercial buildings to be built stronger, more energy efficient, more comfortable and more environmentally friendly. ICFs provide greater energy solutions for any structure. We are fully trained and experienced in installing NUDURA and can also assist with design and execution of projects both within and outside of the U.A.E.
