ABOUT US

Al Amal AlSarea in English means “Fast Work”, two words our company believes in. We try our best to finish our work as soon as possible to maintain our customer’s satisfaction.

Our values in the UAE are different. We care about our customers, whether they are individuals or companies.

We care about providing professional work that lasts.

We seek to benefit everyone, not just ourselves.

We strive to show everyone that there can be a company that genuinely meets customer’s demands and satisfaction.

We try our best to give the best prices on the market, but to earn your trust, we would like to show you our work.

We hope you enjoy our company profile as much as we enjoyed making it.

The background of the entire image is a dark, slightly blurred photograph of a soccer field with white yard lines. In the center, a soccer ball with white, green, and yellow panels is positioned. Behind the ball is a large, semi-transparent blue letter 'A' logo. A white swoosh graphic is positioned above the 'A' logo. The word 'SPORTS' is written in large, white, bold, sans-serif capital letters across the middle of the image, partially overlapping the soccer ball and the 'A' logo. Below 'SPORTS', the text 'AL AMAL ALSAREA' is written in a large, green, bold, sans-serif font, and 'TECHNICAL SERVICES' is written in a smaller, green, bold, sans-serif font below it.

SPORTS

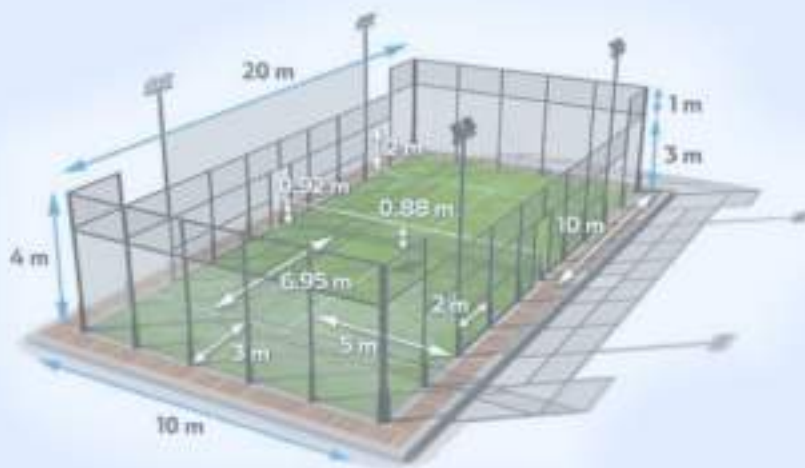

AL AMAL ALSAREA
TECHNICAL SERVICES

PADEL TENNIS

Padel is a sport that is a combination of tennis and squash. It is played in doubles on an enclosed court surrounded by glass and metal mesh. It is one third of a tennis court's size.

The ball can bounce off any wall but can only touch the turf once before being returned. The ball is hit with a stringless racquet with an elastic surface and holes.

The court is 20m long, 10 meters wide, with back walls made from glass with a height of 3 meters, the glass sidewalls are made with 4m high glass or another solid material. The rest of the court is made with a metal mesh up to a height of 4 meters.

We can provide you any replacement parts for your Padel court, equipment and netting.

We can also customize your court if you need extra netting at the top of the court.

We also supply you and install a european style panoramic padel court system for a price no other company can. We have our own tennis factory in the UAE and we can manufacture the entire court for you locally in Ajman, with steel metal meshes. Warranties guaranteed.

TABLE TENNIS

Table Tennis is an indoor sport up to two to four players played on a **Table Tennis Table**, divided by a **Table Tennis Net**. The main objective is to hit a **Table Tennis Ball** back and forth using a **Table Tennis racket**. The equipment is designed per the **International Table Tennis Federation (ITTF)** standard.

The standard size and specification of a Table Tennis Table is 1.5m wide, 2.7m long, 75cm high. Must be made from Masonite, layered by a smooth low friction coating, green or blue color with white sidelines 2cm width and length. It is divided into two halves using a 15.25cm high net.

We are able to supply you and install any replacement parts you require, including the **Table Tennis Table**.

TENNIS COURTS

Tennis is an olympic sport that can be played in singles or doubles. The goal is to hit the ball to the other side and it must enter the opponent's side back and forth until the player does not hit the ball.

According to the **International Tennis Federation (ITF) standards**, a competitive tennis court must be rectangular in shape, sized 23.77m long. For singles courts, the court is 8.23m wide, and for doubles it is 10.97m wide.

Two parallel lines drawn horizontally along the width of the tennis court are baselines, the lines drawn vertically along the length of the court are sidelines.

Two lanes on either side of the court are 1.37m wide and 23.77 long. The net divides the court into two halves and is 1.07m high.

FOOTBALL FIELDS

Our football projects are based on the official dimensions of the FIFA standards. We can however assign custom dimensions for football fields if needed.

The length is between 90m to 120m. The width is between 45m and 90m.

For international dimensions, the length is between 100m and 110m. The width is between 64m and 75m.

We can provide you with the steel fencing and civil work of the entire field, install artificial or natural grass, design and apply line markings for the field with the greatest accuracy

We can also provide the equipment needed for football, and the goals and netting are also available from us.

The pictures display our work in action for a football field project in the UAE.

BASKETBALL

Basketball is a sport where two teams compete to shoot the ball into the hoop of the opposing team. The court is rectangular and each side has a hoop either supported by a post or hung as a board.

According to the **National Basketball Association (NBA)**, the standard dimensions are **28.7m** by **15.2m**.

According to the **International Basketball Federation (FIBA)**, the standard dimensions are **28m** by **15m**.

We provide an **entire basketball court system** with hoops, boards and posts, as well as line markings, acrylic floor coatings and fencing, with equipment.

VOLLEYBALL

Volleyball is a team sport played with a ball and a net. There are teams on each side of the net. One team hits the ball over the net and into the other team's court, trying to make the ball hit the floor of the opposing teams side.

According to the **National Federation of State High School Associations**: The court size of a high school volleybal court is 18.29m long, 9.14m wide.

Indoor volleyball of the FIVB dimensions: 18m long, 9m wide.

Outdoor of the FIVB dimensions: 16m long, 8m wide.

We provide the net, post, line markings, acrylic sports flooring, fencing and equipment for volleyball.

HANDBALL

Handball is a sport where the objective is a team throwing the ball into the goal, with a goal keeper protecting the goal.

They are 40m long, 20m wide and have a total of 800m^2 . The goals are 3m x 2m. The goal keeper line is 4m from the goal, penalty mark is at 7m. The goal area has a radius of 6m from the corner of the goal. The minimum clearance of 2.5m is maintained around the handball court.

GOLF

Golf courses consist a series of holes, a tee box, rough, out of bounds, fair way bunker, water hazard, fair way, putting green with a hole where the player hits the ball with a golf club to score. The hole has a pin to indicate the goal.

As there exist many styles and different lengths, areas and specifications, it is up to the customer to decide the components of the gold game, number of holes, types of hazards and other sizes. We can provide a golf course to your liking, as well as to international standards.

Cricket

Cricket involves two teams with 11 players on each side. The captain who wins the toss decides whether his team bats or bowls first. If they bat first their aim is to score a lot of runs and make sure the other team does not reach that score.

The diameter of the field is between 137.16m to 150m. The boundary is between 59.43m and 82.29m. An international cricket stadium has a minimum of 17,000 square area of a grass field.

RUNNING TRACK

Running surfaces must be soft and sturdy to promote stability and softness to prevent injuries from overuse from accidents that occur while running.

For that, polyurethane is used, an environmentally friendly material that is versatile, non-toxic and long lasting. Minimal repairs and little maintenance.

Rubber surfaces that resist all types of weather and also promote strong stability and softness needed that fit the categories above are what we provide.

We provide the rubber and line markings for runners to enjoy.

FITNESS CENTERS

A fitness center/ gym is an important place for people to maintain their physique. With access to dumbbells, barbells, machines and racks, they can train almost any muscle in their bodies.

Gyms have rubber flooring that is strong and sturdy enough to handle the drops of heavy weights and strong grips to prevent injuries from slipping, as well as sustaining the weight of a big machine. We provide all equipment, as well as flooring.

SWIMMING POOLS

In today's standards, swimming pools are build with concrete, fiberglass or vinyl.

VINYL

Least expensive. The frame is made from wood, plastic or metal. The footing set in concrete. Wall panels are fastened to the framing and plumbing is installed, with a sand base laid. On top of the frame, heavy-duty vinyl liner is fastened and the remaining of the hole is backfilled. Over the wall, masonry coping is installed.

FIBERGLASS

Premolded in many shapes and sizes. Manufactured with steps, benches and swimouts included. The hole is dug, plumbing installed and sand is lowered into the hole and leveled. No framing needed.

Concrete (Shotcrete)

Shotcrete (mix of cement, sand ,water) is shot at high speeds using a pneumatic applicator at high speeds against the earth and base of the excavation of the pool and a grid made of steel rebar. The concrete is then troweled into a smooth surface before it sets and a coat of plastered will be applied next.

All three options are available and we can customize the pool to fit your needs, whether you need international standards or custom dimensions.

CHILDREN'S PLAYGROUNDS

Children are playful and sociable people. Often when they go outside to play, they look for something interesting to do. They may stumble upon a playground area, full of slides, swings and trampolines, a sand box and rocking toys.

The fascination they experience when they discover them is one of the best sight to see.

We provide children's playgrounds, slides, swings, including safety measures like protecting children from harmful objects or impacts. Rubber flooring to absorb impacts and reduce pain, equipment that are designed with children's safety from falling or misuse.

ARTIFICIAL & NATURAL TURFS

Every home/villa owner dreams to have a beautiful green grass lawn to enjoy outdoors.

These turfs can be used for your own personal home, workplace for designs and sports facilities such as football and padel tennis.

We provide long lasting, maintenance free and simple to manage grass to cover your balcony, terrace, garden or lawn, or even your sports facility. It is durable and can withstand any weather condition, including the high heat temperatures of the UAE. It has a water drainage built in that does not obstruct the flow of water, which means easy cleaning.

We provide three types of artificial turfs:

TigerTurf	- United Kingdom
Artificial grass	from Turkey
Supergrass	- China

For sports, we adhere to the standards of artificial turfs for football or padel tennis and/or cricket.

CLEANING

AL AMAL ALSAREA
TECHNICAL SERVICES

HOME CLEANING SERVICE

Balancing work life with personal life is challenging. Working hard, restless and no energy, you come home and find out that you need to clean up the house. You might not have the energy or motivation to clean.

We can help you catch your breath, relax and not worry about cleaning. From dishes, to laundry, vacuuming and tidying, we will relieve you from that stress and bring you a clean, germ-free home that is neat and tidy.

Our team of cleaners are experts in their work and are highly trained and professional. Book us any time, our prices will not disappoint you.

CORPORATE CLEANING SERVICE

A workplace is an environment where employees work and serve their company. Our environments affect us in different ways. They affect our moods, patterns of thinking, and productivity.

An unclean office does reduce productivity. It is challenging to keep an office clean, depending on the amount of employees present and the size of the workplace.

With us, you don't have to worry about dirt or grime, as we clean every nook and cranny. We clean the tables, desks, appliances, windows, rugs and carpets.

After we are finished, we clean the floors with detergents that are safe for health and provide that fresh aroma that helps kickstart your employees' day.

Book us for an office, company or site cleaning. We are flexible.

DEEP CLEANING SERVICE

With our deep cleaning service, we will leave your house or office spotless and shiny.

This service takes some time as it is used for monthly cleaning purposes or "spring cleaning".

Dusting, vacuuming, sterilization, wiping, tidying of all furniture, carpets, windows, appliances, kitchen cutlery, sheets, laundries, and much more.

Book us for your first cleaning session!

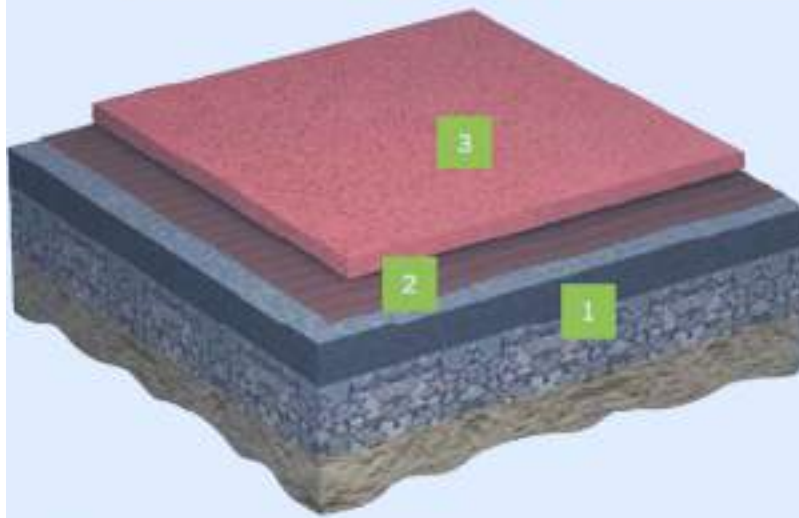

FLOORING

AL AMAL ALSAREA
TECHNICAL SERVICES

EPDM RUBBER FLOORING

EPDM flooring is a durable synthetic rubber that is used as a roof layer.

It is a combination of EPDM rubber granules and a cushion covering of recycled rubber tires using a Polymer from Europe.

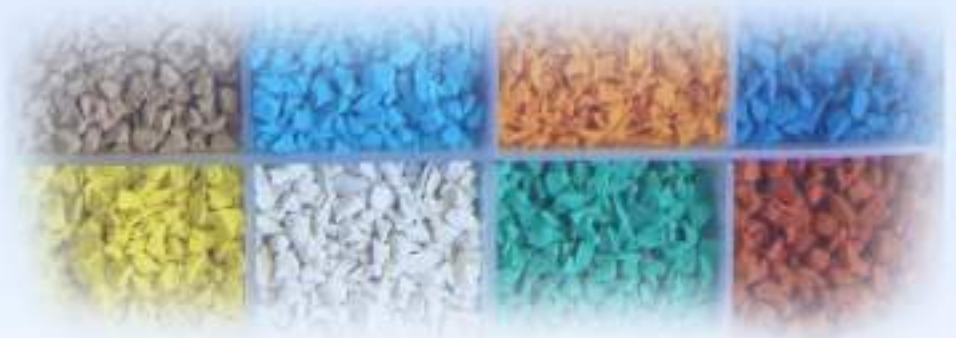

EPDM stands for ethylene propylene diene monomer.

EPDM floorings are able to resist the harsh ultraviolet rays that come from the sun.

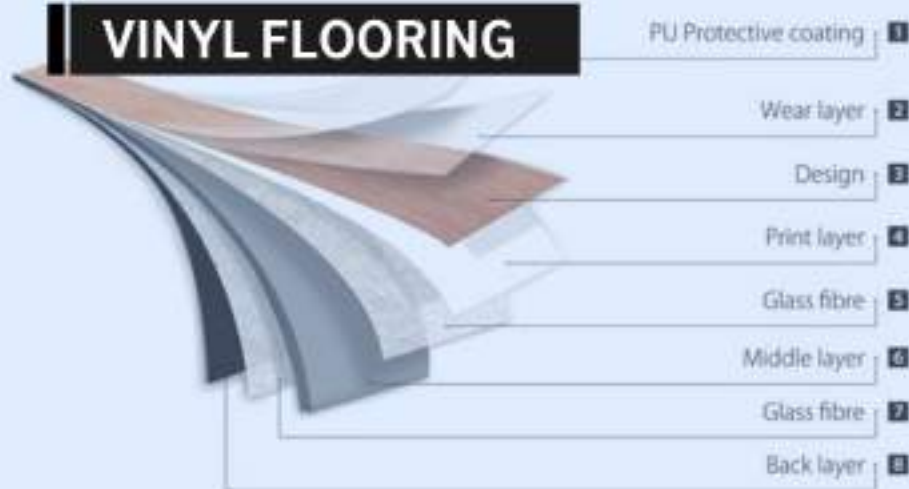

The cost of this flooring may be a little unattractive, but overtime that price will pay off as they don't need maintenance as much. The initial price is paid by the maintenance it will not need.

Why EPDM flooring?

- Durable
- Hassle-free maintenance
- Water resistant
- Recyclable
- Soft in texture
- Easy to install
- Stylable in many ways

VINYL FLOORING

Vinyl flooring is made out of synthetic materials like fiberglass, PVC vinyl and a plasticizer. It is durable, as it is made from multiple layers and keeps you comfortable while walking on it. It is resistant to moisture, making it waterproof. It can be up to 5mm thick.

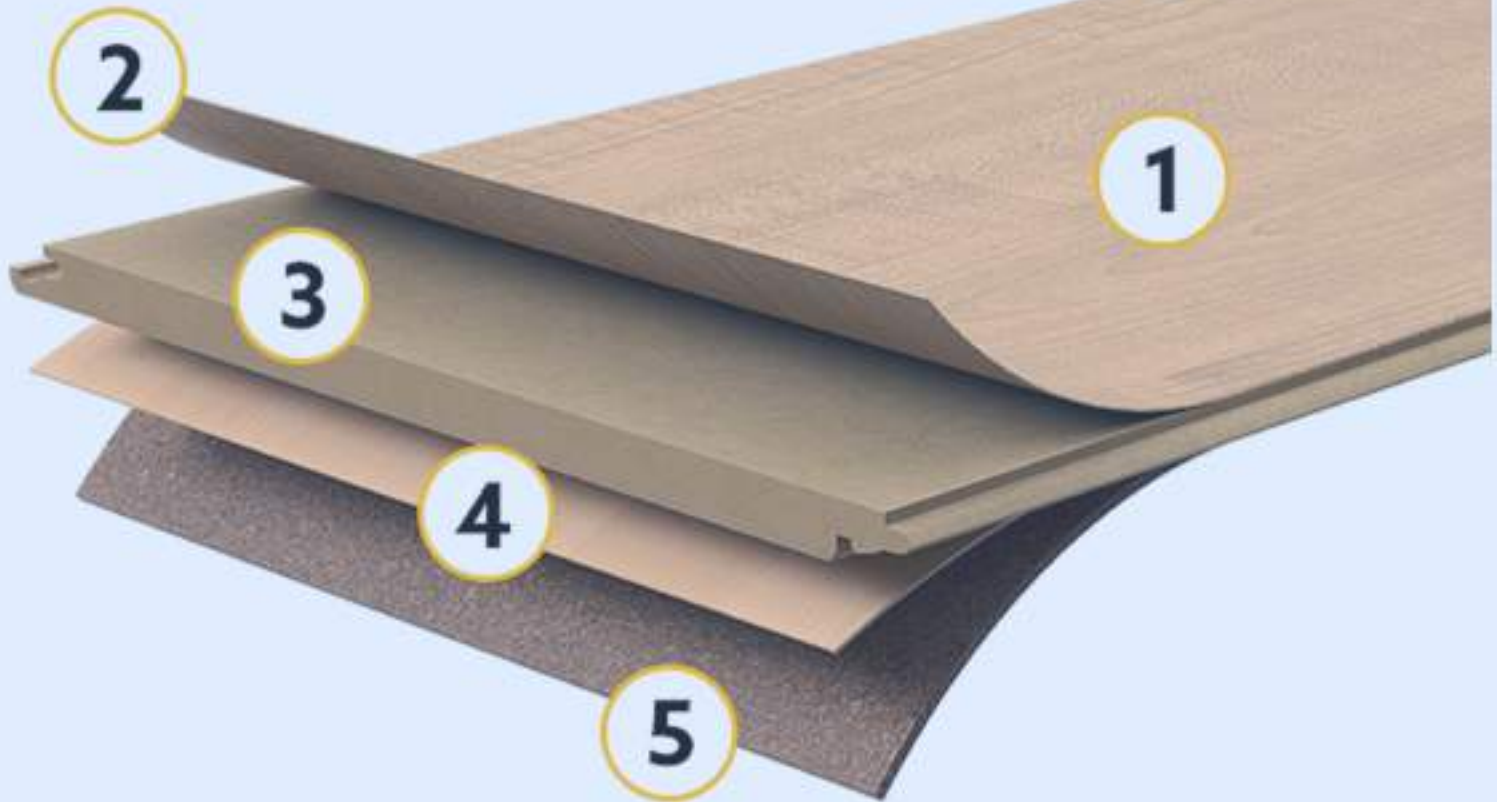

Vinyl flooring can be used in the kitchen, mudroom, bathroom, living room and bedroom. And it is commonly used in indoor basketball courts.

They can be installed by using sheet vinyl flooring or panel flooring. Panel flooring is good if a room is busy or will deal with moisture.

Sheet vinyl flooring is great for a simple installation process.

WOODEN FLOORING

Wooden flooring come in many shapes and sizes. Common types come from wooden planks. They are either solid hardwood or engineered hardwood. They can come in a form of parquet or sheets of cork.

Solid hardwood are made from cutting planks from a piece of wood. The planks are then coated with a protective layer of polyurethane or wax. They are strong and last as long as a house lasts.

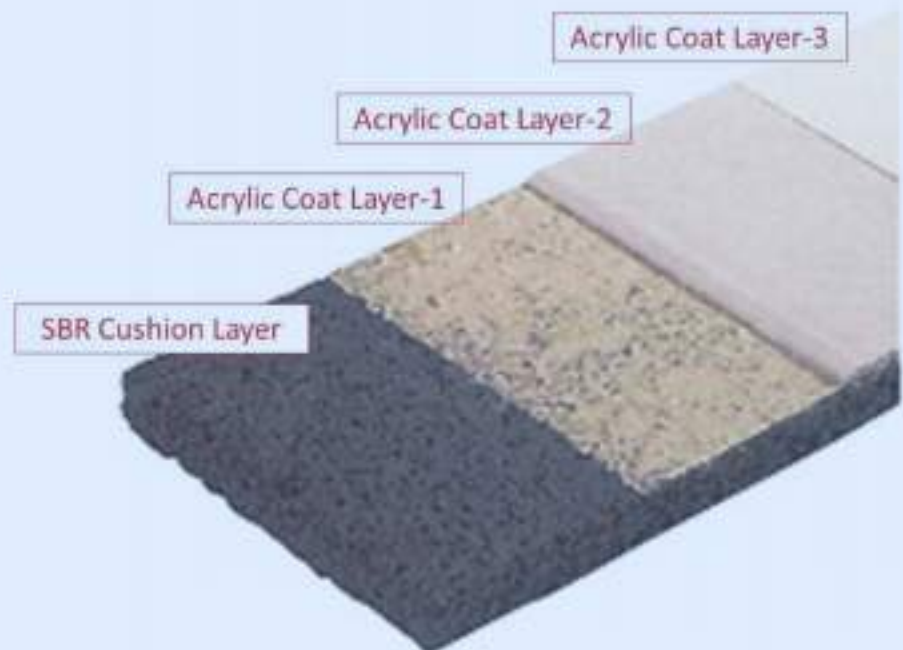

Engineered hardwood is a thin layer of hardwood placed on top of other layers of wood. The layers are all laminated together to form engineered hardwood.

ACRYLIC FLOORING

Acrylic is a durable, hygienic material. Easy to repair and used for many places, not only for sports. It is an anti-slipping material, highly elastic meaning the chances of cracking or breaking is low. The application of acrylic flooring requires a minimum of 10 degrees temperature, but in UAE that is rarely a problem.

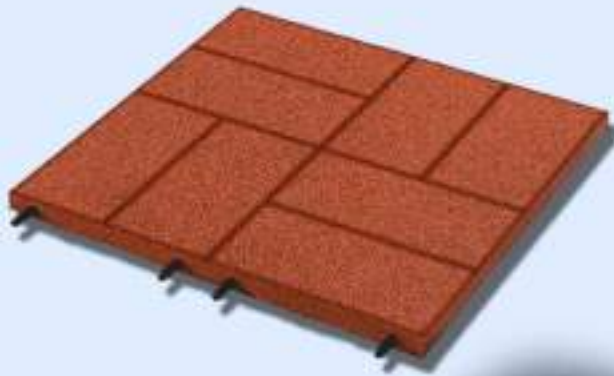

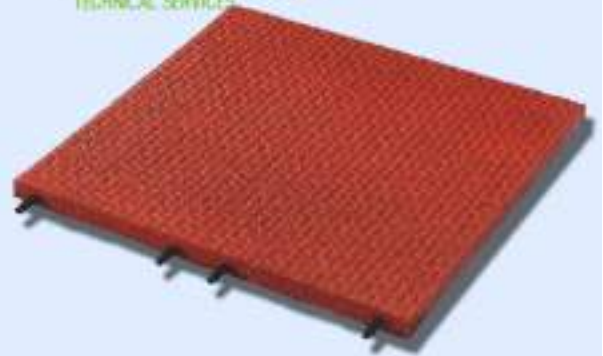

Acrylic is used with a special resin and synthetic infills. Water based acrylic resin, and other types of synthetic acrylic flooring are specially made for sports fields.

It is generally applied on an asphalt or concrete with a special adhesive, as thick as 2-3mm. Durable against all kinds of weather conditions.

HORSE STABLE FLOORING

Easy on horse hooves, stylish and elegant. Easy to install.

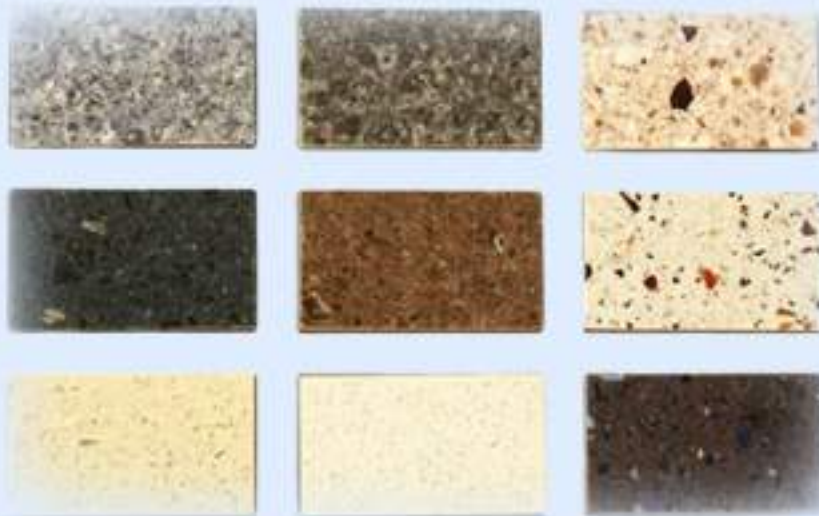

Comes in all shapes, colors and sizes.

GRANITE FLOORING

Granite is made from natural , molten stone that is cooled down. It is a strong and solid type of rock. It is made up of minerals like quartz and feldspar, causing it to sparkle. It can be used almost anywhere, from homes, malls and other places.

Granite gives a luxurious look to any place. It is expensive and heavy and difficult to install.

MARBLE FLOORING

Marble flooring is an aesthetically pleasing material in the flooring industry. It is waterproof, and luxurious. It is made from recrystallizing different elements from fossils, sun dried minerals together under extreme heat to form marble.

SHADES & AWNINGS

AL AMAL AL SAREA
TECHNICAL SERVICES

INSTALLATION OF SHADES

**We provide the supply of shades
as well as installation.**

AIR CONDITIONING

AL AMAL ALSAREA
TECHNICAL SERVICES

UNIVERSAL AC MAINTENANCE & REPAIR
