WHO WE ARE ?

We, Nexawise Technologies is a dynamic and client centric technology company based in INDIA and U.A.E with global perspectives. It has Successfully catered to the needs of medium and large scale corporate the world over.

Nexawise Technologies is a technology solutions provider specializing in Enterprises Software services related to Fax, Print, SMS, and Digital Signature. We deliver reliable and high-quality end-to-end solutions that significantly enhance our client's competitiveness by increasing mobility and data accessibility within their current business structure.

No matter what business, no matter where you are in the world, our industry and technical experts help you shape your future to create clearly defined, measurable value. We co-create and co-innovate solutions that help you better connect with customers, improve resilience, and drive sustainable growth.

HOW WE CAN HELP YOU

We Deliver Unmatched Business Value To Customers Through a Combination of Process Excellence, Quality Frameworks & Innovative Service Delivery

01 Increase Employee Productivity

Enhance Security & Privacy **02**

03 Reduce Print Cost upto 40%

Lower Cost of Operation **04**

05 Improve Business Insights

Integration with Business Apps **06**

07 Globally Recognized Software

Minimize IT Resources **08**

Providing Most Flexible, Secure and Reliable Online & Offline Support with Customized Approach.

Print Management

Print Management Software is a software system designed for the effective management and optimization of print devices and related processes. It is useful in the management of the volume and nature of print materials. It also provides options for user authentication for accessing printers and other document print services. It controls the print queues and provides secure methods of printing.

Our print management solutions are also environment-friendly helping organizations cut waste and reduce carbon footprint. With real-time monitoring, get complete reports on usage, ensuring printing optimization, increased savings and ensuring protection of sensitive data.

Print Management solutions enhances, tracks and secure document output without requiring major changes to the existing network infrastructure or printer hardware. That means organizations can improve the cost-effectiveness of document output while leveraging existing investments in technology.

Some of it's Feature

- Policy Print
- Print/Copy Accounting
- Print Authentication
- Departmental Chargeback
- Asset Consolidation
- Toner Saving Policy
- Delegate Printing
- Scheduled Printing
- Driverless Printing
- Improve Helpdesk Efficiency
- Free-up IT Resources
- Eliminate Waste
- Reduce Print cost upto 40%
- Intergration Reports and Insights
- Encyptions
- Pull-Prints

What You Will Get with Print Management Software

- Manage asset optimization and utilization, and measure the results.
- Transfer print accountability to departments, budget centers or employees.
- View a wide range of data sources (e.g. employee-level job details) in order to make informed decisions.
- Educate employees and modify printing behavior to conform to corporate initiatives.
- Secure network devices so that documents are only printed when the employee is present at the device.
- Reduce toner consumption by 25-35% while still achieving the same print quality you have today.
- Discover and locate print devices on an on-going basis to control your print environment.
- Create and maintain an operational baseline profile of your enterprise.

Some of Our Print Mangement Software are :

- Blueprint | Pharos
- Followme | Ringdale
- Equitrac | Nuance
- Safecom | Nuance

Fax Management

Faxing has a long history as a trusted and secure form of communication and document exchange. It is deeply rooted in many business processes and workflows all around the world. When organizations want to make faxing operations as efficient part of their business, they turn to manage fax solutions to boost efficiency and productivity by increasing the speed of transmitting, routing and processing faxed documents.

Fax Over IP is a complementary IP communication technology. FoIP is the only the Most Secure Communication Technology in the World.

Fax over IP (FoIP) is a software-based technology that compliments and leverages your existing Voice over IP (VoIP) network and eliminates the need for traditional fax boards. With FoIP, your organization can expect all the advantages, reliability, and security of a traditional fax server solution, but with added benefits, such as server consolidation through virtualization and a unified communications strategy that's inclusive of fax.

Increase Speed of Doing Business

Shorten business cycle by delivering quotes, invoices and purchase orders automatically and instantly.

Keep Content Secure and Private

We helps to maintain compliance with regulation around the world to keep protected information private

Enterprise Grade Faxing

Support high volume, high intensity faxing. Support virtual environment and multi-server environment.

Fully Auditable

Instantly verify document transmission and receipt with a full audit trail and customizable notification options

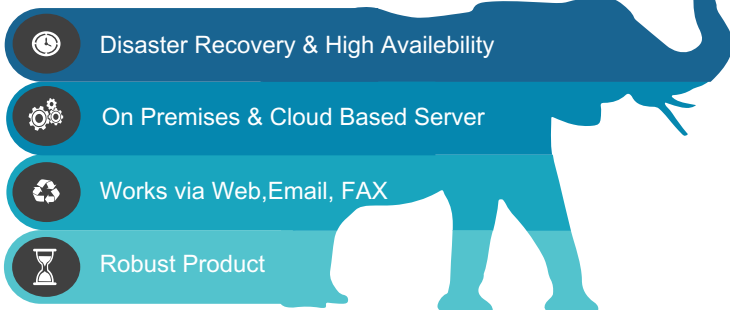

Increased Compliance

Legally recognized formed of delivery and/or receipt in most of countries.

Advance Integration Support

It can integrates with any email client, ERP, ECM and CRM , and any third party app can be configured to fax documents

Our Fax Management Software is :

RightFax | OpenText

SMS Management

Our range of messaging products will satisfy a spectrum of business needs.

Enterprise Messaging Server is the enterprise grade SMS gateway server that can consolidate different messaging requirement across multiple departments and locations to a single robust and reliable messaging server allowing better cost management and control.

SMS-Enabling your Processes

Stock price notification, application approval, broadcast through CRM interface, healthcare solutions with appointment reminders require system integration with existing applications. As a system integrator, you can seamlessly SMS-enabled existing applications

Mission Critical Messaging

Truly geared for mission critical messaging, There is no limit to the number of GSM modems you can connect in one or multiple sites to the messaging gateway, giving you the assurance of better backup and DR setup

Flexible Connectivity

SMS enabling through EasiCommand Builder is either a query or update on your databases. You can connect to any type of relational databases like Microsoft SQL Server, Oracle, Sybase, etc

Load Balancing & Failover

Devices clustering and load balancing can be setup. Message load can be balanced among modem pools or different SMPP connections

Cost-Effective Routing

Messages can be routed through the most efficient mobile operator (typically home network) for cost and delivery efficiency. Routing to GSM modems residing in each local country helps companies to enjoy least cost charges and efficiency

Some of Our SMS Management Software are :

EasiSMS | InspireTech
SMS Gateway | Ozeki

Digital Signature Solution

Digital signatures are inside the heart of many modern standards which ensures more trust and security of data and documents. Some of these are technical standards managed by IETF e.g. PKCS#7/CMS standards and some cover legal and business needs like eIDAS and standards bodies like ETSI and CEN.

SigningHub supports all important signature standards including PAdES, XAdES and CAdES. This includes advanced profiles like *AdES-X-L and *AdES-A.

- Support for over 20 different languages
- Corporate Identity Provider (e.g. Active Directory Authentication)
- Workflow Completion Report
- Document Tracking
- Multiple Recipient Roles in the Workflow
- Create local signatures (smartcards, USB tokens etc.)

Access from Anywhere

SigningHub is universal, use from any device, any operating system and any browser. Integrate SigningHub into your own applications using our simple API. Use SigningHub Integration module for SharePoint, Salesforce, Dynamic CRM and Word for Share, Sign and Track Document.

Signatures in Sequence

Sequential workflow is where each person in the workflow signs (or declines) according to the defined order. In parallel workflow each of the signatories can sign their own copy of the document in any order. In mixed workflow, sequential and parallel both work.

Preparing Documents

All the features you need to prepare documents for sign-off. Add signers, defining signing order, document permissions, initial fields, legal notices and much more. Save workflow templates and automatically apply to future documents

Compliance & Certifications

SigningHub's security engine is certified as a trustworthy system under EU standards (CWA 14167-1) and has become the first in the world to pass the stringent Common Criteria EAL4+ certification process (EN 419 241-2 Protection Profile). It is also certified as part of the US Government FIPS 201 and FPKI Path Discovery and Validation (PD-VAL) programs.

For cloud customers, our secure multi-site data centres comply with ISO/IEC 27001/27002:2013, ISO/IEC 27018, HIPPA & the HITECH Act and FDA 21 CFR Part 11.

Our Digital Signature Software is :

E-Signature | SigningHub
